

# signagelive player X

The signagelive player X has been developed by Remote Media to provide an unrivalled, industry leading Digital Signage Appliance.

Built utilising the latest Intel Xscale technology, Microsoft CE 6.0 operating system and signagelive software the signagelive player X connects to the Internet out of the box and is immediate ready to be updated and managed from signagelive using a standard web browser anywhere in the world.

With no moving parts, small form factor, fanless operation and support for Video, Still Image, Web Pages and Audio, the signagelive player X is the perfect partner for large scale multi-site deployment of Plasma, LCD and Projectors Digital Signage networks.
